BALUNA PENDANT

Grupa designed Baluna with the desire to design light itself; the way it occupies space and affects mood. The opal glass diffuser can rotate around its axis infinitely, achieving a highly precise control over ambient lighting. All functional parts have all been custom designed to fit seamlessly into the form of the lamp. The telescopic bar enables swift adjustments in the lengths of the ceiling pendant lamp. The Baluna collection consists of a lighting series of floor lamps, table lamps, wall lamps and pendant lights. Cord length is 500cm.
