BIK CHAIR

Designed by Numen / For Use Bik is a chair reduced to its basic elements; four legs, seat and a backrest. Barely visible decrease of width of the legs, frontward inclination of the back legs and slightly overstated curvature of the backrest define the character of this, otherwise archetypal chair. Wider back legs are slightly detached aside enabling easy stacking when chairs are not in use. The structure is made of solid wood, while the seat and the backrest are made of moulded plywood. The chair is available with short or longer backrest as well as the option to add a seat pad in fabric or leather. Seat Height 45cm.
