ETTORE & ETTORINO TABLE

Ettore pays homage to master designer Ettore Sottsass, a visionary pursuer of design that would break the traditional aesthetic rules, going beyond the purely ornamental and venturing into the realm of emotional, social as well as aesthetic experimentation. The intention behind the Ettore table was to pay tribute to this philosophy and to aggregate, surprise and stimulate. The central leg, monumental in size, tapers at the base to produce a lighter look and suggest an ironic contrast between the parts and an unexpected effect. The effect is emphasised by the choice of materials: the shiny metal of the plate forming the base reflects the leg, producing the illusion impression that the table is suspended and precariously balanced. Going back to their childhood, Calvi Brambilla drew inspiration from the playful principle of the roly-poly toy. The two designers successfully paired the idea of the toy with the vision espoused by Pianca, champion of an elegant, pared-back language punctuated by premium materials and finishes. Add 1cm to height for the optional Lazy Susan.
