JALIS CHAIR

Designed by Jehs & Laub, the Jalis chair raises the archetypical piece of seating furniture - the cushion - and transformed into chairs. What looks like a cushion with a kink in it is in fact a complexly upholstered, comfortable and stably built item of seating furniture. Jalis also has a slightly flexible back, which makes sitting even more comfortable. The Jalis chair is available in a range of fabrics and leather with different frame options, ranging from wood to metal, with the option of armrests and two backrest heights. All covers are removable. Seat height
