STRAIN EASY CHAIR

Designed by Simon Morasi Piperčić, the Strain armchair provides comfort expected from large dimension sofas thanks to the seat with elastic bands support, stretched backrest shell of leather and free cushion which further eases various sitting possibilities. The seat cushion and the backrest shell tailored from a two-dimensional plate are put on a complex metal structure, and the form is obtained by stretching from the top of the structure to the bottom of the seat. Strain also allows for a complete custom transformation by the ability to select from Prostoria's wide range of fabrics and leathers as well as the frame finish. Seat height is 42cm, seat depth with cushion is 42cm and without cushion 50cm.
